

Sandra Leo

(586) 455-9283 | sandraelizabethlk@gmail.com | Clinton Township, MI

Dynamic .NET developer with 4 years of experience in designing, developing, and deploying scalable solutions. Proficient in ASP.NET, C#, MySQL and adept at collaborating with cross-functional teams to deliver high-quality software products. Strong problem-solving abilities and a commitment to continuous learning.

Experience

TC Energy (Accenture)

Custom Software Engineering Analyst | Bengaluru, India

- Worked as a primary resource managing more than 15 applications and as secondary resource for over 10 additional applications, providing technical support, resolving related tickets and communicating solutions to client.
- Managed incidents, tasks and change request via ServiceNow, including logging, tracking, resolving issues and reviewing change requests to support application updates and deployments.

BCBST (Accenture)

Custom Software Engineering Analyst | Bengaluru, India

- Designed and implemented .NET solutions to extract subscriber, member information from diverse database tables.
- Utilized multiple SQL queries and created and optimized stored procedures for data extraction, ensuring efficient and streamlined operations.
- Developed error handling and data validation procedures to ensure data integrity and minimize errors in the output.
- Assessed and analyzed existing Crystal Reports to understand their structure and requirements and converted them to SSRS, streamlining the reporting process and enhancing data visualization.
- Converted data extracts from Mainframe/COBOL to SSIS by developing DB2 SQL stored procedures and creating SSIS packages using script components for report generation.
- Conducted unit testing to ensure functionality and performance.
- Participated in daily client communication and Scrum meetings to discuss progress, address issues and alignment with project goals.

CMHC Middleware (Accenture)

Application Development Associate | Bengaluru, India

- Analyzed and developed solutions related to Logic Apps and CosmosDB
- Reviewed FunctionApps, assessed requirements, and debugged test cases.
- Created and updated architecture diagrams to reflect system changes and improvements.

Reboot Kerala Hackathon (2020)

BTech Student | Kerala, India

- Developed a web application to aid Farmers in selling their products without intermediary intervention.

Technical Skills

Languages: C#, ASP.NET

Databases: MySQL , DB2

Azure Services: Logic Apps, Function Apps, Storage Accounts, Service Bus, Cosmos DB

ETL & Reporting: SSIS, SSRS

Tools & Platforms: Visual Studio (2019/2022), SSMS, DBeaver, ServiceNow

Version Control: Git, Azure DevOps

Methodologies: Agile, Scrum

Education

KTU University (Kerala, India)

Bachelors in Computer Science (2021)

8.27(10) CGPA

Course and Certification

- Microsoft Certified: Azure AI Fundamentals
- ASP.NET(Accenture Internal Training)
